ACCESSIBILITY PLAN

2026-2029 (NOTE TYPICALLY A PLAN SHOULD LAST FOR 3 YEARS)

Include a short summary here to say what the plan is about so readers can easily understand it.

To note: guidance (shown in blue) included in this template should be removed prior to publication.

1. The Purpose of this Plan

This plan sets out how The Academy will increase access to education for disabled pupils in three key areas:

- a) increasing the extent to which disabled pupils can participate in the academy curriculum;
- b) improving the environment of the academy to increase the extent to which disabled pupils can take advantage of education and associated services;
- c) focusing on how we deliver information, which is often only provided in writing to improve accessibility for all including disabled parents.

Our school accessibility plan will be reviewed every three years and reported on annually.

2. What does accessibility and inclusion mean for our academy?

We are committed to providing an academy that can be accessed, understood and used to the greatest extent possible by all people regardless of their ability or disability.

When reviewing or redesigning our academy environment (such as our buildings, technology, information, communication or culture) we will be guided by the following:

- (a) Provide the same means of use to enable access for all users: identical whenever possible; equivalent when not
- (b) Avoid segregating or stigmatizing any users
- (c) Provisions for privacy, security and safety shall be equally available to all users
- (d) Ensure dignity in use for all users.

3. Definition of disability

The definition of disability is set out in the Equality Act 2010, Part 6:

‘A physical or mental impairment which has a substantial and long term effect on a person’s ability to carry out normal day to day activities’.

Reasonable adjustments for disabled people

Where something the school does places a disabled person at a substantial disadvantage compared to a non-disabled person, we will take all reasonable steps to try to avoid that disadvantage. This may mean changing the way we work, providing extra equipment or removing physical or other barriers.

5 What we have in place to make our academy accessible

The Bishop’s CE Primary Academy is committed to ensuring that the school is accessible to all pupils, including those with special educational needs and disabilities. The school promotes an inclusive ethos where every child is valued and supported to participate fully in school life. Guided by its Christian vision that all members of the community should be able to “live life in all its fullness,” the school aims to create a safe, welcoming and supportive environment in which all pupils can thrive.

Reasonable adjustments are made where necessary to ensure that pupils are able to access the curriculum, the physical environment and wider school activities. Staff provide differentiated teaching, adapted resources and supportive learning environments so that pupils with additional needs are able to engage with learning alongside their peers.

The school site has been designed to support accessibility for pupils and visitors with mobility needs. The building includes step-free access points with ramps to support entry to the school, and wide doorways that allow access for wheelchairs, walkers and buggies. Circulation spaces within the school enable pupils who use mobility aids to move safely between classrooms and shared areas. The school also has a disabled toilet facility that can be accessed when required, ensuring that pupils with additional physical needs are able to use appropriate facilities safely and with dignity.

The school works closely with parents, carers and external professionals to ensure that appropriate support is identified and implemented where required. Clear communication between families, class teachers and the SENDCo helps ensure that pupils' needs are understood and that strategies are put in place to support access to learning and participation in school life. Through these approaches, the school seeks to reduce barriers to learning and ensure that all pupils are able to access the opportunities available within the school community and are supported to live life in all its fullness.

6 Challenges to accessibility that we want to address

While the school is committed to creating an inclusive and accessible environment for all pupils, there are some areas where further development is required. As with many school buildings, some aspects of the site present challenges in ensuring full accessibility for individuals with mobility, visual or hearing needs. This includes reviewing physical access to certain outdoor spaces, ensuring doors and pathways support independent movement for pupils using mobility aids, and improving accessibility features such as signage and hearing support systems.

The actions below will be a summary of the things you decide to do as an academy community to help address the above 3 challenges to accessibility. **Action Plan**

	What we are doing	What will it mean for students	Who is responsible for achieving it	When it will be achieved
1	The school is currently auditing the exit points from classrooms to external areas to ensure that doors used by pupils who require mobility support are appropriately equipped.	This review is intended to ensure that pupils who use mobility aids, such as walkers or wheelchairs, are able to move safely and independently between indoor learning spaces and outdoor areas.	Heather Madsen	A rolling programme review when children move classes.
2	The school is considering how the high grass area at the side of the playground could be made more accessible for pupils with mobility needs. One option being explored is the installation of a ramp to enable children who use wheelchairs, walkers or other mobility aids to access this area safely.	Creating a ramped access point would help ensure that all pupils are able to use and enjoy the outdoor space, promoting inclusion and allowing children with additional mobility needs to participate more fully in outdoor activities alongside their peers. Any proposed changes would be reviewed carefully to ensure that they meet accessibility and safety requirements.	Heather Madsen	End of Summer 2027
3	The school is exploring the use of portable hearing loop systems to improve accessibility for pupils, staff or visitors who use hearing aids.	Portable loop systems can help amplify sound directly to compatible hearing devices, reducing background noise and making spoken communication clearer. Investigating this equipment will help ensure that individuals with hearing impairments are better able to access classroom	Heather Madsen	End of Summer 2027

		teaching, school events and meetings, supporting full participation in school life.		
4	The school will investigate the introduction of braille signage within key areas of the building to support accessibility for pupils, staff or visitors with visual impairments. This may include braille labels on important rooms, facilities and directional signage.	The aim is to ensure that individuals with visual impairments are able to navigate the school environment more independently and safely, supporting the school's commitment to creating an inclusive and accessible setting for all.
